

CAPABILITY STATEMENT

optimising aviation equipment & support

Delivering Support To Our Customers, Drawing On Over 30 Years Manned & Unmanned Operational Aviation Experience.

Our Company

A small and agile organisation delivering strategic and operational technical support with a background in aeronautical engineering, major equipment management and high value Defence procurement. Delivering independent equipment and operational guidance and support to procurement and support teams during the development of critical operational equipment based aviation capabilities and their sustainable support solutions.

Our Experience

Security cleared, experienced and qualified independent equipment and support specialists. Involved within Defence equipment and support since 1983, and have been assisting Industry and MoD customers in the research, design and implementation of major defence equipment based capabilities and their support solutions since 1997. Since 2009 we have been involved in the development of commercially operated Unmanned Aircraft Systems services in UK and we are a UK CAA Restricted National Qualified Entity (R-NQE). Utilising this practical experience and our skills from operational equipment management, we have been providing advice and guidance to clients looking to procure unmanned capability and providing advice and guidance nationally and internationally.

Our Reputation

Customer focused, with a track record of the expeditious provision of commercial and Government procurement strategic and operational support. We deliver value for money, on time and to budget with work delivered in clearly defined firm priced work packages or, we are equally content on a resource effort, limit of liability basis.

Our Capabilities

Our high level capability areas:

- Program and Project Management
- Management of multi-disciplined Technical Support Teams
- PRINCE2 Practitioner
